FULLSTACK JUNIOR DEV

AT IMPACTING DIGITAL (REMOTE)

I am in charge of some of the BMW webpage's frontend layout, microservices and automations. I have configured the CI/CD for every company's project, with production contenerized environment and remote deployments.

- Nextjs, React with Typescript.
- Laravel with vanilla Javascript.
- Docker and Docker compose to automate the environments.
- Python for image detection and edition scripts.
- Apollo with express.
- Azure services integrations.
- Tailwind CSS for the styles.

TESTING

●●○○○ Vitest, Jest

FRONTEND DEV FREELANCE

UNIC LEGACY (REMOTE)

I refactored several web components and styles from a already started project about a single page NFT app. I made the microservices integration for the user auth.

- Nextjs, React with Typescript and Web3js.
- Tailwind CSS for the styles.

GO WEB3-TOKEN LIB

I made a lib to verify and decrypt signed Ethereum tokens and use it as middleware in Go backends and libs.

https://github.com/Miguelo981/web3-token

- Golang.
- Go-Ethereum.

2020 - 2021

FRONTEND DEV FREELANCE

THEMAR SOLUTIONS (REMOTE)

I implemented the layout for a static landing page and developed a reusable animation component that accepts tailwind classes.

- Vuejs with Typescript.
- VueBootstrap components.
- Tailwind CSS for the styles.

AVEM FINANCE LANDING AND DEX (REMOTE)

I implemented the layout for a static landing page and a small DeFi exchange. Made the token swap and login components from scratch.

- Vuejs with Typescript and Web3js.
- VueBootstrap components.
- Tailwind CSS for the styles.

CRYPTOMASTER ACADEMY LANDING AND BLOG (REMOTE)

I implemented the layout for a static landing page and a simple dynamic blog.

- Vuejs with Typescript and Web3js.
- VueBootstrap components.
- Tailwind CSS for the styles.

2019 - 2020

FULLSTACK DEVELOPER INTERSHIP

AT CARVER AS (SPAIN, BARCELONA)

I was in charge of the microservices for a CMS, its Frontend layout, the authentication and the Backend integration.

- Angular with Typescript.
- Java with Spring Boot and Red Hat.

FRONTEND DEV FREELANCE

ALPHA SOLUTIONS (REMOTE)

I created the authentication state, the session persistance, role system and several video features of an crypto investment courses webpage.

- Vuejs with Typescript.
- VueBootstrap components.
- Firebase.
- Dockerized prod environment.
